

147 of 151 cases, those offered to all 5 backends · baseline lmfit
excluded from the profile, partial coverage: jax (offered 127/151); see text

a curve plateauing below 1.0 means unsolved cases, not a longer tail — here scipy-ls-lm solved 146 of 147

deepest rung of the repetition ladder: 100 repetitions requested, 50 effective timed solves per case
